### DONATE NOW

Visit [www.bajaex.com/donateicf.aspx](http://www.bajaex.com/donateicf.aspx) to donate on-line through our U.S. - based fund raising partner —The International Community Foundation. ICF will process your payment and provide you with a donation receipt.

You can also send a check made out to The International Community Foundation, and note "Friends of Wild Baja Fund" in the memo line.

If you wish to give a gift in memory of or in honor of someone else, be sure to include their contact information so that ICF can notify the gift recipient or their family on your behalf. Mail your check and any additional instructions to:

International Community Foundation  
2505 N Avenue  
National City, CA 91950 USA

### JOIN WITH OTHER BAJA EXPEDITIONS TRAVELERS AND SUPPORT THE FRIENDS OF WILD BAJA FUND.

Your gift will protect and preserve some of the world's last great wild places in Baja California Sur, Mexico. These natural protected areas face many immediate threats and need your help to survive.

Funds support proactive conservation strategies, including purchasing conservation easements to maintain lands as open space, developing sustainable fisheries, and environmental monitoring and enforcement.

Thank you for giving generously.

Tim Means,  
Owner and Founder  
Baja Expeditions, Inc.

## SAN IGNACIO LAGOON

San Ignacio Lagoon is one of the last undeveloped gray whale birthing sites on the planet and one of the world's most biologically significant coastal sites. In addition to gray whales, this UNESCO-designated World Heritage Site is home to green sea turtles, peregrine falcons, and hundreds of thousands of migratory waterfowl and shorebirds which depend on the mangroves, beaches, and wetlands found here.

Threats: coastal development, land speculation, oil and gas exploration, introduction of large-scale industry.

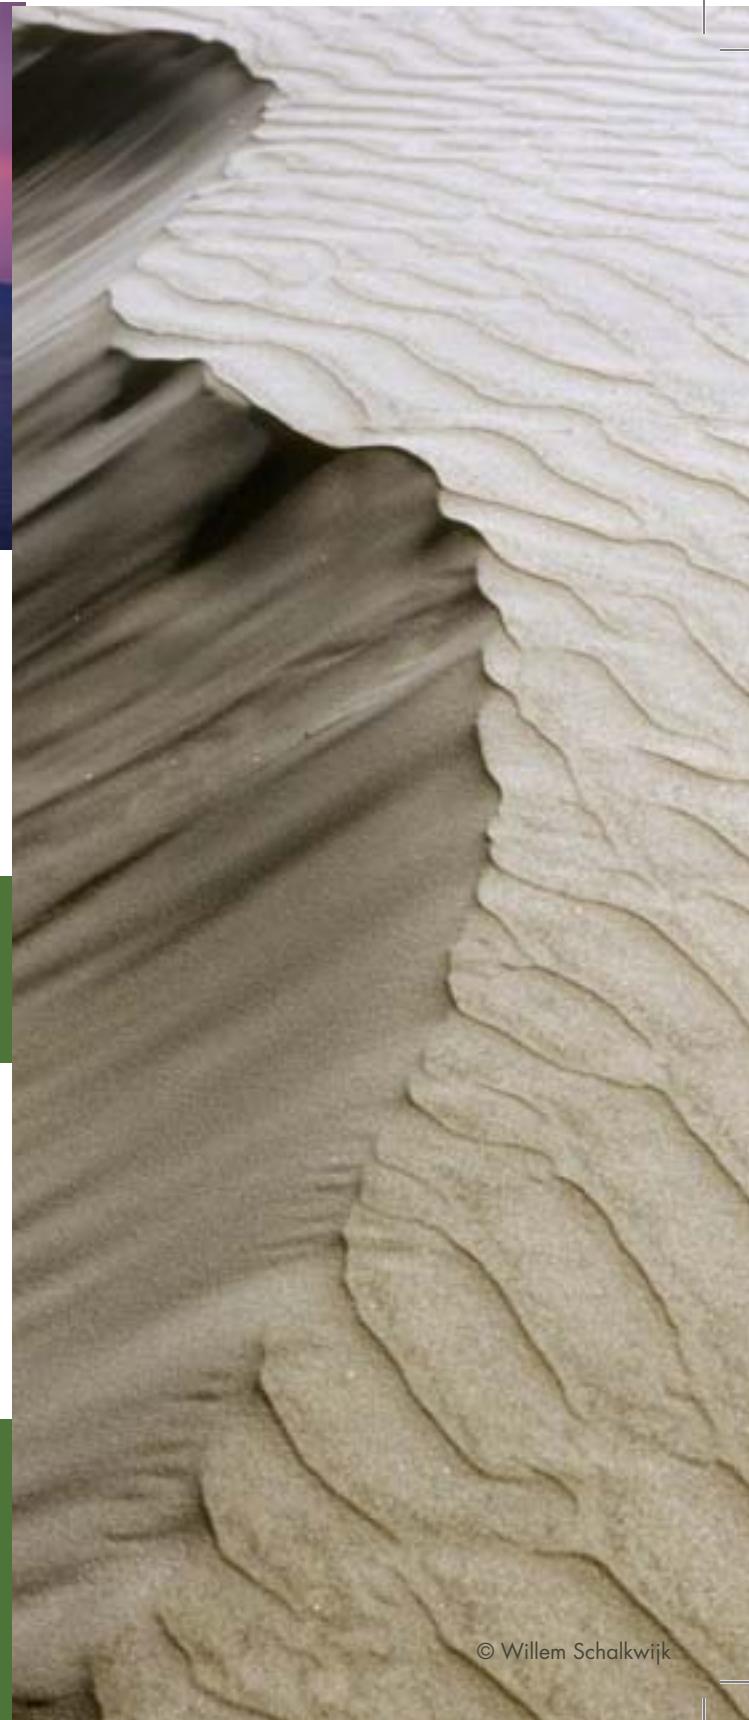

© Willem Schalkwijk

## THE MECHUDO CORRIDOR

The Mechudo Corridor includes 80 miles of undeveloped and still wild coastline between Loreto and La Paz in the Gulf of California. In addition to its relatively pristine condition, this unique area sustains an exceptional diversity of both marine and terrestrial species.

Threats: resort development, poaching of bighorn sheep, overgrazing, introduction of non-native weeds, bycatch of non-targeted marine species.

© Willem Schalkwijk

## MAGDALENA BAY

Magdalena Bay is one of the most important coastal habitats in all of Mexico needing protection. An amazing variety of fish, many species of birds, turtles, sharks, rays, and of course, the famous migrating gray whales attract thousands of visitors here every winter.

Threats: over-harvest of fisheries, poaching and over-harvest of endangered turtles, pollution, lack of planning and zoning, limited enforcement of environmental regulations.
